

Cities' COVID Mitigation Mapping (C2M2) Program: Second-order impacts of a global pandemic

Melinda Laituri
Principle Investigator, C2M2
Colorado State University
22 January 2021

Laura Cline, Program Director, C2M2 Program
Robert Richardson, Jefferson Science Fellow
Erika Nunez, Humanitarian Information Unit

Outline

- Program Support
- Overview of C2M2
- Metrics and Data
- What are COVID-19 Second-order Impacts?
- Supporting Activities
- C2M2 Program Projects

MapGive is a U.S. Department of State initiative that encourages and increases participation in the global mapping community and facilitates the creation of open geographic data to support humanitarian relief and development programs.

You can help. Map any place in the world even if you've never been there.

CITIES' COVID MITIGATION MAPPING (C2M2)

◀ Second-order impacts of COVID-19 will transform society and economies. The C2M2 project builds on global networks of geospatial experts to analyze second-order impacts of COVID-19. These include long-term effects on informal economies, changing patterns of mobility, and access to basic services. ▶

Overview of Cities' COVID Mitigation Mapping (C2M2) program

Build	Share	Produce
<p>Build partnerships for open participatory mapping models to address COVID-19 second-order impacts.</p>	<p>Share geospatial data analysis techniques to identify needs for infrastructure critical to COVID-19 second-order impacts.</p>	<p>Produce digital maps and other datasets to support data-driven decision making that mitigates COVID-19 second-order effects.</p>

C2M2 Fundamental Concepts

- Geography matters: Think Spatially
- Rapid response → Long-term Impacts
- Intersectionality is Central
 - Distributional impacts; Pandemics don't recognize boundaries; Transdisciplinary approach
- Linkages to Sustainable Development Goals
- Geospatial Data + Decisions = Measurable Outcomes
- Monitoring
- Access to Information: Share Information, Collect Feedback, Promote Ethics

In our response to pandemics, we are not just exposing the weaknesses in the system, we're highlighting solutions that need to transcend the period.

Michael Seltzer, Former Executive Director,
Fundations Concerned about Aids, 2020

What is a C2M2 project?

- 1-year project
- Middle/low-income countries: urban areas, vulnerable populations
- *Geospatial analysis on COVID-19 second-order impacts*

Thematic area: What is the question?

Data assessment →

Data gaps/limitations →

Data surrogates →

Data analysis → Analysis of impacts

Outcomes →

Decision making →

Mitigation strategies

Monitoring and Evaluation

Virtual methods for remote
community mapping using
online conference and mapping
tools

C2M2 Indicator Metrics

- People:
 - Number of training or capacity building activities that are designed to promote geospatial awareness and capacity.
- Data
 - Number of geospatial products created to support data-driven decision making by key stakeholders
 - Tools and technology for data generation
- Results
 - Analysis and modeling
 - Mitigation Strategies

Data Analytics Framework

What are COVID-19 second-order impacts?

- Extreme poverty
- Livelihoods compromised
- Inequality
- Forced migration and mobility
- Food insecurity
- Lack of access to education
- Emergence of Violence and Illegal Activities
- Others

Conceptual Model – using a Causal Loop Diagram – Considering potential trends for COVID-19 second order impacts

CLD source: R. Richardson, 2020

C2M2: Emphasis on second-order impacts

Who:

- Vulnerable populations

Where:

- Urban areas in developing countries
- Informal settlements

What are second-order impacts:

- Social services (health, water, education)
- Economic development
- Food security
- Mobility/migration

- *Baseline assessment*
- *Data assessment*
- *Geospatial technologies*

Examples:

- *Adequate access to health services*
- *Impacts on specific economic sectors: tourism*
- *Changes in movement patterns: return to villages*

- Analysis on geospatial data to support data-driven decisions and policy development
- Monitoring and evaluation
- Mitigation strategies
- Research results

Kickoff Workshop with all Stakeholders

 SOUTIEN A LA COALITION DE BONNE GOUVERNANCE
S.C.B.G en sigle, B.P: 78 Uvira.
" Soutenir les bonnes actions en général" 

RDC/ SUD-KIVU: MAIRIE DE BUKAVU.

Dans le souci de collecte des données sur les impacts secondaires de la Covid-19 dans la ville de Bukavu, le Maire de la Ville, Mr BILUBI ULENGABO Meschac a pris part le 04 /12/ 2020 à un atelier de lancement du projet de recherche " Citie's Covid Mitigation Mapping(C2M2)" a l'UOB, Université Officielle de Bukavu.

Cette activité organisée par la faculté des sciences de l'UOB a connu deux grands moments:

- la présentation du projet: objectif, méthodologie et résultats attendus;
- les discussions sur le projet et récolte des données. Dans son mot, le Recteur de l'UOB a remercié l'autorité urbaine pour sa participation et croit que L'UOB est plus aimée par Mr BILUBI d'autant plus que dans moins de deux semaines ils ont déjà reçu sa visite plus de trois fois. Et pense que c'est une joie d'avoir une autorité urbaine scientifique qui apporte toujours ses idées innovatrices dans des activités de réflexion.
